Austria and its imperial family are the obcts of pity, not dislike. Metternich was a ape-goat, which the Prussian dynasty had st. Archduke John, the old miner and ironaster of the Styrian mountains, who waived is right to the throne, in order to marry the nkeeper's daughter-he has raised her charster -he it was who sent Metternich about h is business, whether the great prime minister would or not. The Emperor could not have done it. Archdoke John did it, simply by assuring the people that Metternich had resigned. If a German Emperor were wanting to act as a constitutional monarch, to watch over the industry of a country, and to sympathise with its industrious classes, Archduke John would be the man. If a military leader were wanting to defend, as the King of Prussia said, Germany on both sides, perhaps that monarch would be the most approriate chief. But he is far from popular.

WHERE IS HE !- The New York Sun insists upon it than an individual, supposed to be Louis Phillippe, came out in the America.

"Just as Capt. Parks was leaving the steamer with our files, a passenger requested the use of a package and wrote across the wrapper these words, "Louis Phillippe est a bord sous le nom de Patterson"—"Louis Phillippe is on board under the name of Patterson." The handwriting is evidently that of a Frenchman, and we shall retain it to trace out its anthor. Andrew Patterson is the name of one of the passengers who arrived, but his

When he arrived at majority, he came to America, and worked first in New York, where he subsequently carried on a large business. But failing in business, he went to the case again. In 1838 he worked in the Democratic Review office, at Washington. He was then nearly eighty years of age, having followed the business for some seventy years. He was a hale, hearty old chap—could do a full day's work, and set as good a proof as any man in the office. He worked late at night, and never complained of his eyes. He never worked on Mondays for he always got "smashed" as soon as he was paid off, and did not get over it until Tuesday morning .- Southport Telegraph

Detroit

Ann Annor, Feb. 17th, 1842.

Sir,—Having had repeated opportunities during the last year, of witnessing the salutary effects of Dr. Osgoods India Chologogue, it affords me great pleasure to bear testimony in its favor, as an invaluable remaily in cases of Feves and Ague and Billious Diseases generally. Many cases have come under my observation, of persons who have suffered for years, who have been immediately relieved by the use of one or two bottless of Chologogue; and I have not known a single case where relief has and been obtained by its use. Believing that the general use of this medicine must be of the greatest importance to all pers no living in the pasts of our country, which are subject to Billi us Diamases, I give it this general recommendation. Nor is the pleasure of this act diminished, by the face that I am personally acquainted with Dr. Osgood, and that I have the most entire confidence in him as a skillful, experienced, and judicious physicians.

I remain respectfully your most obedient servant.

WM. A. FLETCHER.

I'F From Hon. Stremen V. R. Thownshood of Michigan State Senate, to the Agent at Detroit.

Sir—you wish me to inform you what I know of Dr. Osgood's India Choligogue, or anti-bilinus medicine. I do believe that if the virtue and efficacy of this medicine, we greatfully known, the Fever and agen would disappear in Michigan.

I procured a bottle in the spring of 1811, and have good resean to believe that myself and family escaped the agent at season in consequence of its use.

Perhaps in no summer since the settlement of this fine peninsola, has the fever and ague been so prevalent as the last. I have ree summended this medicine in numerous instances, and when the disease had become fixed and baffled the skill of physicians; and I have never known it fail. It has universally produced the most happy effects, and I believe it has never been exceeded by any medicine in removing the bilious diseases of the climate.

Yours, respectfully.

Manufacture and keep constantly on hand, a large assistment of
the above articles, together with
their Putent Improved Salsmander
FIRE-PROOF SAFES, which
are as constructed as to set at reat
all manner of doubt as to their
being strictly fire-proof, and that
they will resist the fire of any
building. The counside cases of
these Safes are made of boiler iron, the incide case of sapastone, and between the outer case and inner case is a space
of some three inches thick, and is filled in with indestruenible material, as as to make it an impressibility to burn any
of the contents inside of this Chest. These S apatone Salammaders we are prepared sind do challenge the world to
produce any article in the shape of Bosk Safes that will
stand as much heat, and we had ourselves ready at all
times to have them fairly tested by public bonfire. We
also continue to manufacture a large and general assignment of our Premium Air-tight Fire Pre 18 Safes of which
there are over 800 new in use, and in every instance they
have given entire satisfaction to the purchasers—of which
we will refer the public to a few gentlemen who have
them in use.

INDIGESTION OR DYSPEPSIA. No medicine perhaps has ever been disc vered which gives as much tone to the stomach and causes the secretion of a healthy gostric juice to decompose the food as Dr. Drake's Panacea

Dr. Drake's Panacon is used with the greatest success in Rheumatic Complaints, especially such as chronic. It cures by driving out all impurities and foul humours, which have necumilated in the system, which are the cause of Rheumatism, Gout, and Swellings of the joints. Other remedies a metimes give temporary relief; this entirely eradicates the disease from the system, even when the limbs and hones are dreadfully swellen.

CONSUMPTION.

Consumption can be current—Coughs, Caiarrh, Brunchitia, Spitting of Biold, Asthma, Difficult or profuse Expect ention, Herrie Finsh, Night Sweats, Pain in the side &c. have been cured, and can be with as much certainty as any other discose. A specific has long been a uight for, but in vain until the discovery of Ir. Diske's Panacea. It is mild and safe but certain and effections in its operation, and chann't possibly mainre the most delicate constitution. We would earnestly recommend these afficient to give it a trial—and we believe they will not have occasion to regret it. The system is cleaned and strengthened, the ulcers on the lungs are headed, and the patients gradually regain their usual health and strength. Head the following: CONSUMPTION.

TESTIMONY. DEAR Sin:—In reply to your question respecting the use of Dr. Drake's Panaces, I will say, that sithough a perfect disbeliever in the existence of a Panacea, a cure for all diseases, however visuable it may be in certain conditions of the system, etil I have believed that a cure for Consumptions could be discovered. of the system, still I have believed that a cure for Consumption would be discovered some or later, and currisity led
the to try your medicine in two very involverate cases.

They were procumed by the attending physicians to be
PULLONART CONSUMPTION, and aband need by them as ixcurants. One of the persons had been under the treatment of several very suble practiff new for a number of
years, and they said she had "til fashi med Consumption
e-imbine with Serodals," and that she might image for a me
time, but could not be permanently relieved. In both cases
the effect of the Panaces has been most gratifying. Only
flour or five battles were used by one of the persons before
she began to improve rapidly. The other took about ten,
I will only add that families as I am with consumption by
inheritance and by extensive observation as a study, and
knowing also the injurious effects in nine cases out of too
of tar, boneset, and other vegetable tonics, as well as of
many of the expectorants and sectatives, I should never have
ree summended the use of Drake's Panaces if I had not been
acquainted with the ingredients. Suffice it to say that these
are ree ammended by our most popular and scientific physicisus, and in their present e makined state, form probably
the best alterative that has ever been made. The cure is
in necerclance with a theory of Consumption broached in
France a few years ago, by one of her most eminent writers on mechanic, and now canadished by facts which admit of no dispute.
